

Our Locations

SNB provides a range of service products designed to offer our customers comprehensive service for all brands of inspection equipment widely used within the Food and Pharmaceutical Industries. This covers everything from 24 hour support, upgrades, service, calibrations, hire equipment and product re-work facility. Additionally, SNB design and manufacture bespoke equipment based on customer requirements.

Head Office

Our Head Office in Sherburn-In-Elmet houses our main production facility. SNB Sherburn have specialists in welding, fabrication and assembly. We also have a dedicated electronics shop for circuit board repairs and a team constantly working on machine building.

Luton Office

The SNB southern office is located on the outskirts of Luton. The workshop specialises in manufacturing of Electrical Panels for new machines or system refurbishment.

Scottish Office, Bathgate

SNB Electronic services opened the new Bathgate site back in 2019. Our brand new Scottish base in Bathgate is home to our specialist CNC workshop. The Scottish team aid our other locations by manufacturing parts intrinsic for our machinery.

SNB Bathgate, is situated a short distance between Edinburgh and Glasgow, allowing customers to receive quick service response times.

The investment that SNB have made in Scotland will put us at the forefront of product inspection service within Scotland. This will allow us to deliver a comprehensive service package at a highly competitive rate to our customers based within Scotland.
