

SNB offers a complete range of metal detection, x-ray and checkweighing equipment services for the food, pharmaceutical and packaging industries. From initial concept we design, manufacture and supply followed by ongoing first class service support for all your product inspection requirements.

Metal Detection Systems design, manufacture, install and service

With the ability to incorporate all of the major brands of Metal Detectors, we design and manufacture systems to suit our customer's applications.

Key Features:

- Standard and bespoke systems to latest COP
- Modular or PU food quality conveyor belting
- Range of automatic reject devices to suit product types and line speeds

X-Ray design, manufacture, supply and service

Automatic X-Ray inspection with advanced inspection algorithms for unrivalled performance

Key Features:

- Computer controlled low energy technology
- Automatic set-up and calibration
- User friendly operator interface
- In-house design and manufacture of key components

Checkweigher and Combination systems supply

SNB provide a range of bespoke systems and can supply systems from all the leading brands

Key Features:

- Independent advice on the most appropriate specification
- Standard design to handle various pack types and line speeds
- Integrated reject devices
