## What did you most enjoy about the training?

The technical e perience concept based learning and clarification through e amples in each point that connect the industrial e perience of the trainer. I learned so much from him. I plan to join many of the training courses in the pipeline under his guidance and direction. I loved interacting with the other delegates from various industries as we learned a lot from one another s e periences as well as the uestions they asked. I got good insight into how the standard is interlinked. The training was fun and easy to follow considering the whole concept is new to me.
