

**Company Name:**

Symington's

Can you please introduce your company?

Symington's is a food manufacturer with 4 sites in the UK, recently purchased by an Italian food company Newlat Food S.p.A (Sept 2021). We have been innovators of food since 1827, and have an extensive range of ambient food (dry, retorted and baked) across our manufacturing sites.

Why did you choose the BRCGS Standard?

The BRCGS standard was chosen as a 'worldwide' passport for food safety and high site standards. The flexibility of the bolt on modules allows us to demonstrate competency in a wide range of food manufacturing principles.

What are the benefits being BRCGS certificated?

The BRCGS standard portrays a confidence in our food safety protocols, quality management system, supply chain management and high site standards which is essential for all our customers.
