

**Company Name:**

Akomex Group

Can you please introduce your company?

Akomex Group is one of the leading manufacturers of cardboard packaging in Poland. We make high-quality solid cardboard packaging, leaflets, labels, as well as trays and laminated sheets for the pharmaceutical, food, electronics and technology, personal care, and home appliances sectors. We also carry out individual projects within all market segments. Thanks to many years of experience, we are a trusted partner for international companies throughout Europe. Our products can be found on the shelves at the largest retail and pharmacy chains in Europe. Akomex Group's pillars are Experience, Quality, and Flexibility.

Why did you choose the BRCGS Standard?

The BRCGS standard was chosen when we started producing products for direct contact.

The implementation allowed us to start talks with customers of the domestic and foreign market in the food segment, and to systematize the process, meet the stringent GMP requirements and develop our own, high standard of production.

What are the benefits being BRCGS certificated?

Working with this standard allows us to continuously improve our knowledge and, above all, to raise the awareness of all employees in terms of product safety.

Any changes assumed by each amendment to the standard, such as safety culture, allergen policy, enable us to broaden our horizons, a continuous process of development, improvement and gaining knowledge through training and teamwork.

Each of us is responsible for the safety of the product and the final consumer, and thanks to everyday work with BRCGS, we learn about new regulations, legal provisions as well as customer and market requirements.
