Introduction to the BRC Partner Connection Programme

About BRC Global Standards
BRC Global Standards publish a series of Standards that cover Food Safety, Packaging and Packaging Materials, Storage and Distribution, Agents and Brokers, and Consumer Products, covering the full supply chain. These guarantee the standardisation of quality, safety and operational criteria and ensure that manufactures fulfil their legal obligations and provide protection for the end consumer. BRC Global Standards are now often a fundamental requirement of leading retailers who use the Standards as part of their brand protection processes.

About the Partner Connection Programme
At BRC Global Standards, we believe in the strength and power of relationships, which is why we’ve introduced the BRC Partner Connection Programme for third party suppliers to help you increase your sales leads and grow revenues.

The programme gives you an opportunity to promote your goods and services to our 22,000 certificated sites worldwide, covering manufacturers and companies in the food, packaging, storage and distribution, agents and brokers, and consumer product sectors. In addition, you’ll be reaching the 30,000 monthly visitors to our websites, who include manufacturers, retailers, food service companies, consultants, specifiers, and government and regulatory officials.

To ensure the best results, the BRC Partner Connection Programme only partners with forward-thinking companies that provide first-class products or services relevant to our global audience.

How does the Programme work?
• You register with the BRC Partner Connection Programme and pay a £2000 annual fee.
• Information about your products and services, along with links to your website and contact details, are added to our Partner Connection Programme catalogue in the Knowledge Centre, which features on both the BRC Global Standards and BRC Business Services websites.
• Your company is introduced to all BRC certificated sites with a short editorial feature in one of our quarterly Global Standards newsletters.
• You benefit from our email marketing and social media promotion of the Partner Connection Programme, and receive the ‘In partnership with BRC Global Standards’ logo for use on websites and marketing materials.

To find out more and to discuss this opportunity please contact Nigel Scott, Sales & Marketing Manager on +44 (0)20 7854 8990 or email nigel.scott@brcglobalstandards.com.
Profitability and efficiency are at the heart of every organisation. Put simply, the best way to boost your bottom line is to sell more or spend less – or both.

Effective procurement is crucial but often neglected – either outsourced to cost-cutting consultants or passed to an in-house finance team. But used as a strategic function, with full support from the boardroom, it can deliver enterprise-wide benefits.

ERA goes far beyond the short-term savings of consultants and the limitations of in-house teams to deliver long-term financial and organisational benefits. Our expertise spans over 100 supply areas from Managed Services such as logistics, travel and waste to Business Costs such as Insurance, Utilities and Communications, to name but a few.

As independent advisors, we offer objective procurement advice and partner with you to enable you to make the right decisions. Not just to help you get the best deal now, but to improve your supplier relations in the long-term. In addition, we continually monitor your suppliers using our tried and trusted methodology so they keep delivering the same level of service to your organisation.

Our clients benefit from the following results:
- savings of 19.7% on average across all projects
- savings in over 90% of projects undertaken
- over 60% of the savings realised are with the incumbent supplier

GlassGuard® is Europe’s leading manufacturer of fragment retention lamps. GlassGuard® fragment retention lamps and GlassGuard® luminaires provide a safer lighting solution for food production and packaging sites, minimising the risk of glass contamination from accidental lamp breakages.

Fragment retention lamps such as the highly acclaimed GlassGuard BlackBand® are standard glass lamps treated with a technologically advanced coating manufactured by GlassGuard® to EN61549, the highest standard for quality. In the event of accidental breakage, such as frequently happens when they are being changed, the coating will retain all of the broken glass and phosphor powder safely, preventing widespread contamination.

GlassGuard® has been supplying fragment retention lamps to the food industry across Europe for over 20 years, and has been working in partnership with BRC Global Standards since 2010 to promote safer lighting.

GlassGuard® fragment retention lamps and GlassGuard® luminaires are essential considerations in the management of site standards, in particular building fabric and contamination control.

Contact GlassGuard® today for your lighting requirements.

World leaders in the design and manufacturer of food safety inspection equipment

For the past 45 years Loma Systems has focused on the food industry, building the most durable metal detection, checkweighing and X-ray inspection systems. Loma has an impressive installation base, boasting 120,000 inspection systems globally. Loma’s equipment is famously robust captured by the motto - “Designed to Survive”, many units can be found within the harshest conditions of industrial food production.

As the inspection market continues to change, food manufacturers are under more pressure than ever before to adhere to increasingly stringent levels of compliance. Whether responding to the latest requirements set out by the British Retail Consortium or individual Retailers Codes of Practice, food manufacturers must demonstrate tight control and complete line integrity. Loma offers comprehensive advice and complete inspection solutions to ensure all food suppliers meet and exceed the latest regulations, whilst offering easy and reliable operation.

Loma’s products are uniquely engineered to facilitate compliance with international product safety standards and weight legislation, whilst identifying product defects and eliminating contaminants for consistent quality.

Loma is committed to manufacturing durable equipment backed by great customer service, whilst providing cost-effective solutions for all food product inspection requirements.

Recall Shield has been designed exclusively for food and beverage companies graded A and A+ against the BRC Global Standard for Food Safety across all of their sites in the UK and Ireland. It is a new product designed to meet the contamination insurance and crisis management needs of food and drink companies.

Food product recalls are occurring with ever greater frequency and severity, affecting all parts of the supply chain. With the rise in social media’s influence on consumer behaviour and the evolution of regulations, food companies need to be prepared to protect against the risk of reputation and financial damage. Together, Willis Limited, Faber Global, BRC Global Standards and XL Group have built Recall Shield.

Recall shield offers coverage for:

- insured event
- accidental contamination
- malicious contamination
- product extortion
- government recall
- adverse publicity

For more information about how Recall Shield can protect your business please download our information leaflet [here](#) or contact us directly.

Access control and workforce management solutions

Grosvenor Technology is a UK based access control and workforce management technology provider with global reach. Our offering encompasses hardware, software and IP/cloud based products and services, providing an end-to-end people movement solution for businesses of all sizes, and numerous blue-chip retailers.

Sateon (GTL’s latest Access Control offering) is 100% browser based, multilingual and includes a full array of features, all of which can be used without installing any software. Sateon is easily scalable for systems of any size, located anywhere in the world, and ensures ease of maintenance and on-going support.

A further strength of Sateon lies in its open architecture, giving it the ability to integrate with third party systems, such as fire, CCTV, or third party databases, and an array of other systems. These features give Sateon great flexibility to provide the best control systems, for the widest possible range of corporate clients.

GTL is a manufacturer of advanced Time and Attendance data collection terminals. These terminals form part of wide-area-network workforce management systems for the control of workforces across multiple sites and areas. GTL also supplies interface and integration software designed to communicate with applications, developed by our partners or potential partners. GTL’s advanced integration tools create a speedy and professional development environment.

Leading global supplier of ISO 21469 certified food grade lubricants

FUCHS LUBRITECH (part of the Global FUCHS Petrolub Group) is the world’s leading manufacturer of specialty food grade lubricants for use in the food, beverage and pharmaceutical industries.

The CASSIDA and FM ranges of high performance food grade lubricants cater for all types of application and with their ISO 21469 certification and NSF registration, provide the user with the assurance that there are no safer food grade lubricants available anywhere in the world.

Many of the CASSIDA and FM products carry OEM approvals from world leading manufacturers of equipment used in food, beverage and pharmaceutical plants so CASSIDA and FM users can be assured that they are using products that have, in many cases been tested and approved by their own equipment suppliers.

Some of our most popular products include our Grease Gun and Lube Centre. We also have information available regarding our Food Grade Lubricants and Services, and the Energy and Cost Savings you can make by utilising our products. For more information, please see our Product Catalogue and Value Proposition.

**The food industry specialist: adding value and raising standards**

Needlers is the UK’s leading specialist supplier of hygiene, safety and PPE products and services to the UK food manufacturing industry.

Based in Yorkshire and with its own national delivery fleet, the company stocks a comprehensive range of products designed to meet the demands of food production. These include Needlers’ own brand of imported disposable PPE, stocked in a BRC approved warehouse which operates to the same standards as a food production facility.

Needlers is leading the way when it comes to innovation. The company offers a range of online services to its customers, designed to make the process of ordering PPE and hygiene products simple, transparent and efficient. These include online account real-time order reporting and a bespoke stock management system.

**Added value and customer service is the core of Needlers’ approach. Customers enjoy benefits which include free video training content and white papers to help with audits.**

Willing to be adventurous, and passionate about getting it right; Needlers is The Food Industry Specialist. Find out more about Needlers products and services by visiting their website below, downloading their product catalogue or getting in touch with the team using the contact details below.

**Your partner in inspection and quality control since 1984**

Whatever your market sector and inspection parameter, and whatever your budget and performance requests are, PRISMA INDUSTRIALE has the solution.

PRISMA INDUSTRIALE was established in 1984 in Fidenza (Parma, Italy), in the heart of the Food Valley and the food mechanical engineering industry. Producing dynamic weighing systems and metal detectors, PRISMA INDUSTRIALE is well-established in their field for high-quality and reliable products. PRISMA’s quality control systems keep up with the ever-increasing levels of compliance demanded by the food industry, assuring its customers meet the latest regulations.

Over the years the **product range** has evolved and expanded to offer specific solutions for the food industry, as seen in their **product brochure**. Today PRISMA INDUSTRIALE is the only company that produces 100% Italian-made metal detectors and checkweighers and is the leader in this sector in the Italian market, with a sales network that covers the whole territory.

PRISMA INDUSTRIALE also offers an unbeatable customer service by responding to requests in detail, owing to their high level of subject knowledge. The company also provides a thorough pre and post sales service, and an ability to design precise customer solutions. This makes PRISMA INDUSTRIALE a real partner in inspection and quality control.

Metal detectors with exceptional ROI guaranteed!

Fortress Technology has grown rapidly to become a world leader in the design, manufacture and sales of metal detector systems for global food producers, and operate in more than 45 countries.

During the lifespan of our systems, all detectors are fully supported with parts, service and onsite upgrades to satisfy the latest functionality. We operate a ‘Never Obsolete’ policy, which means that equipment never needs to be replaced, so not only does this save our customers money, but this policy also helps Britain’s food factories upgrade existing well-built kit to meet their carbon footprint and sustainability goals.

Customers can be assured that Fortress metal detectors are fully compliant with the latest industry standards, and our customers always achieve exceptional overall equipment effectiveness.

For high-volume customers with space constraints, we’ve developed a unique single detector head system to inspect and independently auto-reject packs across multiple lines.

This unique Fortress solution can reduce line footprint by 40%, and means our customers receive substantial purchase and maintenance savings compared to the cost of a single line detection system. With proven sensitivities, our range of Stealth and Phantom detectors are able to find the smallest metal contaminants, and all system data can be easily downloaded to meet the most stringent food safety audits.

Find out more about Fortress’ world class metal detectors by visiting our website or getting in touch with the team using the contact details below.

From farm to fork, we focus on building successful food safety cultures

Alchemy Systems is a global leader of innovative technologies and services designed to align employee behaviour with a company’s quality and safety commitments. From farm to fork, we focus on building successful food safety cultures for large, diverse workforces.

Over the last decade, we have partnered with more than 1,800 food facilities worldwide to train employees, validate comprehension, and create behavior change that helps them:

• reduce injuries
• increase productivity
• minimise waste
• improve customer satisfaction
• be audit-ready 24/7

Our complete software solution helps optimise your workforce in ways that drive continuous improvement and operational excellence:

• quickly communicate critical information to employees
• provide customised content for company or job-specific requirements
• validate employee participation and comprehension
• verify behaviour change

Magnet testing and bespoke magnetic separators

We design and manufacture industrial magnets for the removal of metal contamination. Our customers include global leaders in the food, pharmaceutical, power handling, ceramics, glass, plastics, recycling, textiles, wood, oil and gas, and animal feed industries.

We manufacture bespoke equipment according to your specifications and, using 2D/3D software, will send you a GA drawing for your approval prior to manufacture. Magnets will be constructed from either 304 or 316 stainless steel and can be fully welded, crack and crevice free to food or pharmaceutical standards. Choose from finishes such as painted, bead blast, dull polish, or mirror finish.

BRC Global Standards requires that magnetic separators used for metal contamination in the food industry, are tested and certified. We can test and certify your magnets, providing full documentation to complement your existing HACCP procedures.

The report identifies the required strength of each magnet, type, reading and whether the magnets have passed. The report also assesses the general state of the magnets and housing, identifies where action is required, along with photographs for easy identification.

Please view our product brochure, and for a free quote, please call +44 (0)1706 645 824 or email sales@greenwoodmagnetics.com.

Global supplier of high performance food grade lubricants

ROCOL is part of ITW Inc, a multi-national, Fortune 500 Company. ROCOL has been providing engineers with high performance lubrication solutions for more than 130 years. We pride ourselves on developing advanced products with customer needs at the core. ROCOL is renowned for trusted superior performance, full audit compliance and excellent after-sales support.

At ROCOL we design and manufacture technically advanced food grade lubricants, specifically tailored for the food and clean industries. In addition to being NSF H1 registered for absolute food safety, our range of FOODLUBE lubricants help improve cleanliness and efficiency, whilst significantly reducing costs and downtime.

ROCOL products are formulated and thereafter rigorously tested against our competitors to ensure maximum performance every time. Our range of FOODLUBE products are manufactured to adhere to strict procedures and standards, whilst offering crucial safety assurances through our NSF registration, ISO 21469 certification and HALAL accreditation.

For more information on our FOODLUBE product range, please download our brochure, selector, or our latest promotional leaflets on our DETEX Technology, and food safe aerosols.
Lockton is the world’s largest privately owned, independent Insurance Broker and Risk Manager.

In the UK we have a particular expertise in the food sector and count companies from the farm gate through to key retailers among our clients. At Lockton we understand the risks.

What sets us apart from our competition? Our primary focus is on what is best for our Clients and not what shareholders or the market expects or demands. This Client focus is reflected in exceptional client retention (96% last year).

At Lockton our priority is to listen to you and understand your business. Then working with our carefully selected panel of Insurers we will deliver for you:
- Competitive premiums (and hopefully savings) – we understand the pressure of tight margins in the food sector.
- Insurance cover that is “right” for your risk exposures. We have some fresh ideas, such as our market leading work on Business Interruption and Cyber Liability.
- A service plan backed by an experienced and consistent team giving great advice, managing your claims and working with you to manage risk out of your business.

**Best quality cleaning tools and metal detection products**

Maya Professional Tools is a Spanish company that offers one of the best solutions in hygienic cleaning tools, as well as high quality metal and X-ray detectable products. Established in 1990, the company has focused on the food industry market by offering a specialized product range that covers all food factory plant requirements.

We offer up to 10 colours in our range (white, blue, red, yellow, green, orange, purple, black, grey and brown), which helps organise the factory to prevent cross contamination problems. For articles which are meant for direct food contact, migration tests have been carried out according to EU regulation 10/2011/EC.

Metal and X-ray visible products are manufactured with additives that conform to food contact regulations: this addition allows material that may become accidentally detached from an article in use to be detected by standard in-line metal or x-ray detection equipment.

For more information and support, please contact our sales team below.

High quality food safe detectable products from the original pioneers

BST have over 30 years’ experience in the development and manufacture of high quality food safe plastic & rubber detectable products. We set ourselves apart in the industry by offering high quality detectable items, paying particular attention to our XDETECT metal & x-ray detectable plastic compound, which is highly shatter resistant, available in 8 colours, FDA approved, EU 10/2011 compliant and also incorporates antibacterial protection in specific applications.

The quality of our products is only superseded by the quality of our service and support. Our team can visit you on site to see and understand your requirements first hand. We usually have a stocked product to fit your needs, however our bespoke manufacturing capabilities mean that a solution to a problem is never far away.

Examples of detectable products in our range include pens, markers, clipboards, self-adhesive tapes, safety knives, catering knives, scrapers, scoops, jugs, brushes, shovels, ear protection, plasters, hair / beard nets, gloves, paper tags, plastic tags, test pieces and detectable materials.

Technical specifications, detectability guidance and food contact approvals, where applicable are extensively documented to aid our customers with their BRC and other audit requirements. BST are proud partner of the Made in Britain campaign – with 70% of our product range manufactured in Britain.

Detectamet is a world leader in the design and production of metal and X-ray detectable products and equipment made using our very own specifically formulated detectable plastics and materials. The company has a unique reputation for the enthusiastic development of products to help food companies reduce the risks of food contamination. Detectamet has the most comprehensive range of detectable products in the world and the company produces them within ISO 9001 and ISO 14001 certificated management systems.

Detectamet offers choice and solutions to satisfy special requirements. Many products can be ordered in eight different colours to help customers reinforce their colour coded management systems. The extensive range of detectable stationery products, for example, includes pens, several refill types, and many items such as rulers, calculators, clipboards and paperclips and detectable stapleless staplers. Detectamet also supplies a range of detectable label systems and provides cleaning equipment and personal protection items; from stretch wrap to rubber bands and silicone mastic to nitrile gloves. This demonstrates the kind of commitment to satisfying customers’ needs that typifies Detectamet’s business ethos.

Established for over 10 years, Detectamet won the SOFHT Company of the Year Award for businesses of less than 100 employees in 2013. View the Detectamet Product Catalogue by [clicking here](#).

Leading the way in Hygienic Hose Management

Flexrite are delighted to celebrate 30 years of being one of the leading companies supplying flexible hoses and associated products to the Food, Brewing and Pharmaceutical industries.

Flexrite design hygienic couplings compliant to industry requirements, and are able to create bespoke fittings to meet client needs, with the support of full-time draughtsman and Engineering Associates, G.Caswell Engineering, who manufacture the fittings.

As well as being ISO9001:2008 accredited, Flexrite also pride themselves on full material traceability, along with certification to European and International standards.

To meet customers’ demands for health and safety, technical help and quality assurance, Flexrite have developed various Hose Management packages. This includes their unique Iflex Hose Register, which enables customers to view all hose entries, download datasheets and certificates of conformity, and is tailored to suit individual customers.

Iflex offers a number of key benefits, which ranges from due diligence visits to full hose inspections, health and safety checks and preventative maintenance measures.

Find out more about Flexrite in our product catalogue, or alternatively please get in touch with the Hose Management team below.

Supporting food safety with speciality H1 registered, ISO 21469 certified lubricants

Acknowledged by many food, beverage and pharmaceutical companies as the global leader for speciality lubricants – with arguably the largest range of H1 registered lubricants – Klüber Lubrication was one of the first companies in Europe, and the first in North America to be certified according to ISO 21469, with 5 accredited sites globally. Klüber Lubrication manufacture their products in a clean and safe environment, and as a member of EHEDG (European Hygienic Engineering and Design Group), are part of food safety initiatives right from the start.

An affiliated brand of the Freudenberg Technology Group, Klüber Lubrication has been developing high-end tribological solutions and ambitious technical concepts for over 85 years’. Known internationally for their substantial number of OEM approvals from world leading manufacturers of food, beverage and pharmaceutical equipment they are a clear leader in the market when it comes to problem-solving, optimisation, continuous improvement, cost control and best practice, continuing to meet the ever-increasing demands on industry to deliver reliability, sustainability and overall equipment effectiveness whilst maintaining consumer safety.

Their Tech Days enhance maintenance management planning by integrating different areas of maintenance responsibility and implementing a lubrication strategy that increases efficiency and asset performance through modern lubrication innovations and techniques.

Your Complete Chemical Solution for ‘Food Processing Safe’ Maintenance Chemicals

Ambersil is a market-leading, internationally recognised, brand of MRO chemicals from CRC Industries; trusted by professional engineers for ‘right first time’ results.

The Food Processing Safe® range of >35 maintenance chemicals offers a true, single brand, complete chemical solution. Whatever the maintenance requirements, Ambersil has it covered:

- solvent degreasers, ● cleaners, ● wipes, ● lubricants (oil, dry, high solids), ● greases, ● bulk oils, and ● polymer processing & packaging release agents.

Fully NSF registered with letters of registration available upon request, auditors recognise and respect the Ambersil name as a go-to brand of quality and attention to detail.

Free-of-charge, value-added services that make a positive difference include:

- MyAmbersil (automatic datasheet updating),
- GREENLIGHT® (risk reduction for maintenance chemicals through colour coding), and
- Perma-Lock® system (aerosol only, non-detachable components: “Prevention. Better than detection”)
- Regionally based full-time Sales Managers for product questions & support
- Free samples for trial
- Available to order 24/7 through an international, regional, and local distributor supply network
InPest is the line designed by GEA to meet needs of professional pest control. The mission is to study and develop pest monitoring devices such as sexual pheromones, glue traps, U.V. fly killers. Driven by innovation and with particular attention to the environment our goal is to manufacture effective solutions to work closely with BRC.

The InPest products are designed and produced respecting high standard basing on customer’s needs in order to give the best tool for any situation always respecting and preserving the environment and those who live in it.

The quality standard is ensured by 3 internal laboratories:
- one for the synthesis of pheromones;
- one for breeding insects;
- one for the quality control of raw materials and final products.

Key figures of GEA:
1. 30 employees (including agronomists, an entomologist, a veterinarian, a chemist)
2. 2 facilities in Settimo Milanese - Italy
3. Total sqm: 3500 mq
4. 10 lines of production
5. Sales: all Europe
6. 1 registered patent
7. 1 biocide registration: TDDA pheromone
8. ISO 9001:2015 certification on all the company phases

THE INDEPENDENT INSPECTION, TRAINING AND CONSULTANCY PROFESSIONALS FOR PEST MANAGEMENT

Acheta Consulting Ltd was established in 2000 and is the largest specialist independent pest management consultancy in Europe.

Independent Inspections
‘In-depth’ pest control inspections are a BRC requirement. Our independent inspections fulfill this requirement, and can either substitute for inspections provided by the pest control contractor, or be delivered on an ad hoc, perhaps trouble-shooting, basis. Our inspections offer the following benefits:
- Improved performance from the pest control contractor
- Potential cost savings: our recommendations are commercially unbiased
- Access to an expert who is familiar with the site
- Improved due diligence protection

Reports include a quantitative quality assurance assessment of the pest control contractor’s performance.

E-learning
Everyone working in the food industry has a role to play if the Integrated Pest Management (IPM) programme is to succeed.

Our e-learning packages are designed to impart essential knowledge, in an informative, entertaining and interactive way, to allow everyone to successfully fulfil their role.

Consultancy
Drafting and review of pest control specifications, analysis and interpretation of pest monitoring data, insect identification, pest-resistant packaging trials, and field-testing of pest control products, are some of the diverse range of ‘consultancy’ services we provide.
