

Press Release

For immediate release July 2018

BRC GLOBAL STANDARDS LEADS THE WAY IN FOOD SAFETY WITH RELEASE IN AUGUST OF NEW GLOBAL STANDARD

BRC Global Standards has announced the publication date of 1 August 2018 for the eighth issue of its internationally recognised Global Standard Food Safety.

The focus of attention for this issue has been on:

- encouraging development of product safety culture
- expanding the requirements for environmental monitoring to reflect the increasing importance of this technique
- encouraging sites to further develop systems for security and food defence
- adding clarity to the requirements for high-risk, high-care and ambient high-care production risk zones
- establish a new approach to the audit process and audit reporting with greater focus on factory operations and management commitment
- ensuring global applicability and benchmarking to the Global Food Safety Initiative (GFSI)

The requirements of Issue 8 represent an evolution from previous issues with a continued emphasis on management commitment, a food safety programme based on hazard analysis and critical control points (HACCP), and a supporting quality management system.

Setting the standard internationally for best practices in food safety, certification to the BRC Global Standard Food Safety allows suppliers worldwide to show customers that they are upholding the highest standards of safety, quality, and legal compliance. Audits against Issue 8 are set to begin in February 2019.
