

**Company Name:**

Tetra Pak

Can you please introduce your company?

Tetra Pak is a world leading food processing and packaging solutions company. Working closely with our customers and suppliers, we provide safe, innovative, and environmentally sound products that each day meet the needs of hundreds of millions of people in more than 160 countries. With more than 25,000 employees around the world, we believe in responsible industry leadership and a sustainable approach to business.

Why did you choose the BRCGS Standard?

We chose the BRCGS Standard as the benchmark for our quality and safety efforts because it is a globally recognized certification body that sets the standard for packaging safety and quality. The rigorous requirements of the BRCGS Standard ensure that we have a comprehensive packaging safety management system in place, covering all aspects of production, from raw materials to finished products.

In addition, the BRCGS Standard helps us to identify potential risks and implement effective controls to minimize them. This, in turn, enhances our ability to protect our customers and ensure their confidence in the packaging materials we provide.

What are the benefits being BRCGS certified?

Enhanced brand reputation: BRCGS certification is widely recognized as a symbol of quality and safety, and it demonstrates to customers and stakeholders that we are committed to providing safe and high-quality products.

Improved food safety management: BRCGS sets rigorous standards for food safety management, and the certification process helps us to identify and address potential risks, ensuring that we have robust food safety controls in place.

Increased customer confidence: BRCGS certification provides our customers with the confidence that our products meet the highest standards for quality and safety, and it gives them peace of mind that we are dedicated to providing safe and high-quality packaging materials.

Access to new market opportunities: BRCGS certification can help us to access new market opportunities, as many customers and retailers require their suppliers to be BRCGS certified.

Continuous improvement: The BRCGS certification process is a rigorous and demanding one, but it provides us with an opportunity to review and strengthen our processes, so we can continue to provide safe and high-quality products to our customers.
