

**Company Name:**

Natzan Packaging

Can you please introduce your company?

We at Natzan Packaging are highly committed to our customers needs and manufacture flexible plastic packaging for standard but also special applications of them.

We have been producing plastic packaging in our family business for the most exacting of demands since 1989. We not only produce the packaging materials for the market but will also design own, highly customized, special-purpose welding machines to bring also tailor made solutions professionally to life.

Our international customers from the food, chemical and pharmaceutical industries value us for the direct, solution-focused and high-quality way in which we do business together. Many of them even for decades.

Why did you choose the BRCGS Standard?

We do serve multiple customers in the European Union, in UK and in the USA. With a strong focus on food and pharmaceuticals, we are producing packaging solutions for most sensitive industries. Our customer require highest standards for their production, but certainly also expect that from their suppliers. BRCGS is considered as such an internationally recognized standard with acceptance all over Europe but also the US.

It was self-evident to consider BRCGS as the standard of choice. We want to support our customers by orientating ourselves at the highest standard with a best-in-class approach in manufacturing operations and systems.

What are the benefits being BRCGS certificated?

Our customers do very much appreciate our professional setting and well-structured line-up throughout the entire company. The certification itself and specifically our latest audit rating make the whole team of Natzan Packaging proud of the achieved and shows our commitment to continue that path also in future

For ourselves and for our customers, it underlines confidence in our doing. And even more: It creates the basis for further growth and emphasizes our strong focus on customer centricity in all our doing.
